senate Committee Demands That Comper Las Ills Evidence Before It Judge Met ammen Says That the Bill Would Destroy Workman's Individuality

WASHINGTON, June 3 .- The hill restricting work on all Government contracts to eight hours a day, which recently passed the House unanimously, was discussed before the Senate Committee on Labor and Education this morning.

The Government contractors who opposed the bill were represented by J. McGammon, appearing for William Cramp & Sons and the Carnegie and Bethlehem Steel Works; Judge L E Payson, for the Newport News Ship Building Company and the Union Iron Works: ex-Senator Higgins of Delaware, for the Harlan and Hollinsworth Company and Daniel A. Tompkins of Charlotte, N. C. representing the Manufacturers' As-

ociation of the United States. Mr Gompers was disinclined to furnish any further testimeny, seeming to regard the printed hearings of the proceedings before the House Committee on Labor as sufficient evidence for the Senate committee

oufficient evidence for the Senate committee to consider. He said it would be a very great hardship to go all over the subject matter again and dwelt very emphatically on the unanimous passage of the bull by the House on two different occasions and its subsequent death in the Senare.

These remarks evidently irritated Chairman McComms. "What the House has done in this matter," he said, "does not exonrate the Senate from its duty, and we must hear this matter carefully. We should have a fair representation of the

must hear this matter carefully. We should have a fair representation of the facts in order to give both sides equal chances. I therefore insist you give us the facts of your side of the case. Judge McCammon, in addressing the committee, said that the attitude of the people he represented toward the bill was that of opponents to an attempted outrage against the manufacturing interests of the country as well as a large section of labor.

against the manufacturing interests of the country as well as a large section of labor.

"We possibly represent," he said, "a larger manufacture of laboring men than do those who are favoring the bill, and the injury that will be suffered should this bill passwill be borne by the laboring men more than the manufacturers. Individuality will be destroyed and the wage-carner will become the victim of a despotic law which is both socialistic and unconstitutional."

Both Senator McComas and Senator Harris of Kansas criticised the title of the bill as being at strong variance with the hill as being at strong variance with the language set forth elsewhere and elicited by questioning Mr. Gempers that it was really the purpose of the bill to compet an Shour day in all manufacturing establish-ments, whether employed on Government

Sub-equently Mr. Gompers seemed to change his mind in this respect, for he said that the desire was to limit wage earners to an 8-hour day with the consent of their employers when they were employed on other than work for the United States.

PORTO RICAN JUDGMENT. First One Under the U. S. Supreme Court Decision of Last Fall.

WASHINGTON. June 3.- Judgment was rendered to-day by the Court of Claims in the first of the Porto Rican cases brought before the court as a result of the United

States Supreme Court as a result of the United in the Deoley case.

Congress passed an act last month permitting merchants in Porto Rico to sue the United States in the Court of Claims and recover judgment for amounts paid as duties on imports into Porto Rico from April 11, 1890, to May 1, 1800. This act also authorized the payment of interest at 6 per cent on all such claims.

Antenio Dariz Conzales and Ricardo

At 6 per cent, on all such claims.

Antonio Dariz Gonzales and Ricardo Alonzo of San Juan are the first of the claimants to recover their money. They were represented by the Hon John G Carlisle, former Secretary of the Treasury, and Henry M. Ward of New York. The amount recovered is \$3.814.25.

The total amount of the Porto Rican claims now before the court is estimated at \$400,000, and judgment in each of these cases will be rendered as rapidly as the papers can be prepared.

AGRICULTURE IN NEW YORK. There Are 220,120 Farms in the Valued at \$888,184,180.

WASHINGTON, June 3.—The Census Bureau to-day issued a report containing statistics of agriculture for New York, which shows that on June 1, 1900, the farms of the State numbered 226,720, and were

valued at \$898,134,180. Of this amount \$236,950,000, or \$7.9 per cent epresents the value of buildings, and \$551,-174,220, or 62 1 per cent., the value of land and improvements other than buildings. The value of farm implements and machinery was \$55,000,000, and that of live stock was \$125,583,715, the total value of farm property being \$1,000,723,835.

The total value of farm products for 1899 was \$245,270,600, of which amount \$05,352,257, or 38.9 per cent., represents

Since 1850 the number of farms in New York has increase d56,090, or 32.9 per cent., but in the last decade there was a gain of only 497 farms, or 2 per cent.

COMMAND ON BOARD SHIP. Senter Line Officer at the Head When th Captain Is Away.

WASHINGTON, June 3 -There has been trouble recently among officers on half a dozen United States warships, and the Navy Department has taken a hand in the difficulties. It all arose over the refusal of some officers to let other officers take command of ships in the absence of the Captains.

The controversy was practically the same in each case, namely, that a senior officer in charge of the engineering department of a war vessel declined to permit a juntor officer engaged in line duties to assume the Captain's place after his detachment or during his temporary absence.

Judge Advocate General Lemly has given a legal opinion which is approved by Secre-tary Moody The decision is, in effect, that the senior

Consideration of tuberculosis and its pathological and bacteriological aspects occupied the morning and afternoon sessions of the American Congress of Tuberculonis yesterday.

Dr. L. L. Kinyoun, who made the introductory address, expressed the belief that 1899 was \$245,270,600, of which amount \$95,332,257, or 38 9 per cent., represents the value of animal products and \$149,918,-353, or 61 1 per cent., the value of crops including forest products.

The total value of farm products for 1895 exceeded that reported for 1895 by \$83-677,501, or 51.8 per cent.

The gross farm income for 1890 was \$181,841,420, and the percentage of gross income upon investment was 17 per cent. Of New York's total land area of 47,620 aquare miles, or 30,176,800 acres, 22,648,100 acres, or 74.3 per cent., are included in farms. patients was, therefore, of the highest

> Dr. H. Edwin Lewis read a paper on "The Importance of Individual Predisposition in the Development of Tuberculosis," in which he controverted to some extent the views of Dr. Kinyoun, showing how rarely attendants in tuberculosis hospitals contract the disease through infection. He believed that personal resistance to the bacillus was to be strengthened by better habits of living more than by sanitary

precautions

Dr. William 8. Mrezill of the Carnegie Laboratory said that the popular belief that basterial virulence is the chief cause of tiberculosis is an error. The present contradictory state of opinion he laid to the unsatisfactory results of laboratory experiment, which has been directed toward the destruction of the tubercle bacillus, while the cause of tuberculosis seemed to be a higher form of micro organism.
